

**Status:** Trainee  
**Start:** ASAP  
**Duration:** 18 months  
**Position:** Junior Project Assistant  
**Qualification:** Master's Degree in Architecture/ Civil Engineering  
**Country:** Germany, worldwide  
**Sector:** Construction of social and public infrastructure

### **Introduction**

CES Consulting Engineers Salzgitter GmbH is an independent consulting engineering company with worldwide experience based in Braunschweig, Germany. CES offers solutions to complex multidisciplinary engineering tasks for all civil engineering and related sectors. CES renders services ranging from preliminary investigations to construction supervision and cost controlling, training of the clients' staff, advisory services in the operation and maintenance of installations, as well as the organization and strengthening of public authorities and institutions. CES works mainly in the field of development cooperation and implements infrastructure projects for national high-end clients (ministries and line authorities) funded by international donors.

### **Project Description**

With its department for architecture and urban planning, CES implements social and public infrastructure projects such as schools, hospitals, health centers, markets and others worldwide in the context of international development cooperation, with a focus on sub-Saharan Africa.

### **In the framework of our junior level program we offer:**

- Access to the field of international technical development cooperation
- On-the-job training in international development projects
- Active involvement in the implementation and management of current construction projects of social and public infrastructure in Braunschweig headquarter and in different project field offices, working in international teams
- Good salary conditions, including travel and accommodation costs covered when abroad in project countries
- Opportunity for permanent employment

### **Duties and Responsibilities**

- Support the Project Director and team in the architectural department
- Cooperate in the implementation and solution finding of project-relevant tasks
- Create, adjust and review architectural preliminary and final designs based on client input and feedback to meet user and client requirements
- Check, correct and elaborate contract documents (BoQs, specifications, ToRs etc.)
- Support HQ team in specific project planning and implementation relevant tasks
- Support field teams in project countries in specific project planning and implementation relevant tasks

### **Qualification, Skills, Languages, Experience:**

- A Master's degree in architecture or civil engineering
- Analytical and structured work approach
- Significant interest and commitment in intercultural settings and working environments
- Excellent presentation skills
- Accountability for assigned work
- Very good proficiency in **French** and English is a must, knowledge of German is an asset
- Proficient with architectural CAD applications (such as ArchiCAD, Revit)
- Knowledge of sustainable design and construction
- Willingness to travel abroad
- previous study or work experience in international development projects or in other projects abroad (preferred)
- As an asset: 1-2 years of work experience

Interested applicants are required to send a complete CV (English, EU standard) and a cover letter to [jobs@ces.de](mailto:jobs@ces.de)

Please indicate the job reference "**Application for Architect/ Civil Engineer – Junior level, No.0795**" in the subject line. Only shortlisted candidates will be contacted.
